

Steps to Using CareZips®

Innovation Improving
the Dignity of Patient Care

Step 1: Unzip the 3 zippers - one on each side and the 3rd from the interior of one knee to the other interior knee

Step 2: Open each snap on both sides at waistband

Step 3: Fold down the front to the knees to more easily access the adult brief or bag

CareZips® - innovative pants that **provide caregivers (CNAs) an easier, faster and more productive change** of an adult brief or cath bag or for wound care. The unique frontal opening **allows for safe & effective attention with less back strain to the caregiver** plus minimal physical exposure and more dignity for the patient. Socks and shoes do not necessarily have to be removed. The garment is designed with three zippers but the two side zippers are positioned slightly forward on the body to eliminate any discomfort particularly when rolled side-to-side.

- Designed to give caregivers timesaving ease and enjoyment in their daily work
- Reduces the probability of skin shears
- Does not necessarily have to dress and re-dress an incontinent adult several times a day
- Easy to wash – no ironing necessary
- Fabric – 72% poly, 21% rayon, and 7% spandex – athletic-feeling, very soft, and durable
- Flexible and comfortable to use and to wear
- Seven sizes and four different colors

Patent: D,721,469 & D,721,468
